When citing a book entry from an online database, look for citation information at the:

- Beginning of the article
- End of the article
**Book**
A basic online database book citation has two containers:
1. Information about the **Database**
2. Information about the **Book**
If you are citing a Chapter written by an author who is different than the author of the book, or only citing a Section of the book expand the template.
Expanding the template will open three containers:
1. Information about the **Database**
2. Information about the **Chapter/Section**
3. Information about the **Book**
This tutorial will cover how to cite an online book using two containers.
Select the database from the dropdown menu.
You should have written the permalink to the article on your printout. If you did not record the permalink, you will need to search the database again and copy/paste the permalink into NoodleTools.

If more than one author is given, click **+Add Another Contributor** to add another field.

Title: Famous earthquakes.

Authors: Farnon, John

Document Type: Book Chapter

Subjects: EARTHQUAKES, NATURAL disasters, EARTH movements

Abstract: In 1906 San Francisco, California was shaken by an earthquake that lasted three minutes. In 1201 an earthquake rocked the eastern Mediterranean and may have killed well over one million people. The 1923 earthquake which devastated Tokyo, Japan and Yokohama, Japan also made the seabed in nearby Sagami Bay drop over 1,300 feet.

Lexile: 1100

Full Text Word Count: 236

ISBN: 9781590844694

Accession Number: 9211163

Database: MasterFILE Main Edition

Section: 100 THINGS YOU SHOULD KNOW ABOUT
