</table>
This citation has three containers:
1. Information about the **Database**
2. Information giving credit to the **Article Entry**
3. Information about the **Journal**
Select the database from the dropdown menu.
You should have written the permalink to the article on your printout. If you did not record the permalink, you will need to search the database again and copy/paste the permalink into NoodleTools.

- **Title:** Shale-Eating Microbes Recycle Global Carbon.
- **Authors:** Pennisi, Elizabeth
- **Document Type:** Article
- **Subjects:** BACTERIA, CHEMICAL reactions, RECYCLING (Waste, etc.), SHALE, WEATHERING
- **Abstract:** Focuses on a study by geochemist Steven Petsch and colleagues, which suggests that microbes carry out biochemical reactions that help recycle the elements of life. Promotion of release of organic materials locked up in sedimentary rocks; Emphasis on the common sedimentary rock shale; Role of microbes in weathering.
- **Lexile:** 1290
- **Full Text Word Count:** 673
- **ISSN:** 0036-8075
- **Accession Number:** 4527414
- **Database:** MasterFILE Main Edition
- **Section:** News of the Week
