What still feels like a challenge to you?

Writing a book.

How long did that take?

From the time I officially started, 15 months. I had taken notes while I was on the station and during the flight, so it’s not like I was starting with a blank piece of paper. But it was a lot harder than I expected. If someone said they wanted me to write another book, I would tell my agent, “Yeah, I’ll do it. You’ve got to pay me twice as much, though.”

Scott Kelly: I agree with Mark. There have been times when government oversight has been identified as the best way to retain safety, consistency and reliability throughout the program. It just seems inconsistent to me that we'd now take all of these government employees, who are at the very tip of the spear on the safety of our nation's skies, and turn them over to a contractor.

A year is a long time to spend as a human satellite circling Earth in zero gravity. But if astronauts didn’t like it, they wouldn’t sign up, right? “Don’t get the idea that there was a shortage of candidates,” says Scott Kelly, a short guy with a shaved head and a stocky build. “A lot of people wanted to do it.”
