Select an Overview article

   By: Bailey, Elise. Source: Points of View. Cigarette Smoking. 2013, p.1-1. 1p. Abstract: The article presents an overview of cigarette smoking in the U.S. The link between lung cancer and smoking was proclaimed by former U.S. Surgeon General Luther Terry in 1954. There has been an increasing number of municipalities in the country that enacted bans on smoking in public places, as tobacco companies have been accused of adding nicotine to cigarettes. A brief history of smoking in the U.S. is presented, as well as smoking-related terms and their definitions. Reading Level (Lexile): 1180. (AN: 25427666) HTML Full Text

2. Point: Smoking Bans Are Not the Answer.
   By: Lee, M. Newton, Heather. Points of View. Cigarette Smoking. 2013, p.2-2. 1p. Abstract: The article presents an argument against bans on smoking in public places in the U.S. It is suggested that such bans are a form of paternalistic legislation that does not consider an accurate analysis of the costs and benefits of smoking as its basis. Researchers are also accused of exaggerating the public health risks of exposure to second-hand smoke. The article also offers an assessment of the true costs and benefits of smoking. Reading Level (Lexile): 1440. (AN: 26611680) HTML Full Text

   By: Rich, Alex K., Griswold, Ann. Points of View. Cigarette Smoking. 2013, p.3-3. 1p. Abstract: The article calls on the U.S. government to enforce a national smoking ban in public places. It is suggested that by allowing people to smoke in public places, smokers are allowed by the government to infringe upon the rights of people to breathe clean air. The article also discusses the right to breathe freely, as well as the dangers of secondhand smoke. Reading Level (Lexile): 1400. (AN: 25611676) HTML Full Text

   By: Parrish, Ann. Points of View. Cigarette Smoking. 2013, p.5-6. 1p. Abstract: This article presents an argument for prohibiting cigarette smoking in public places. When a smoker puffs on a cigarette, cigar or pipe, they are inhaling poisons into their own body, but that is not all they are poisoning. The smoke they exhale joins sidestream smoke and the combination poisons the air around them, affecting others breathing the same air. This combination is known as
