Endangered Species Wheel Instructions

Instructions: For this project, you will make a picture-view wheel. You will use this wheel in a presentation of your endangered animal to the class. Look for your information in the library and in the endangered species encyclopedia set.

1.) To do this, cut a circle out of a cardboard box (an empty cereal box or soda carton will do fine). The circle should be about the width of a piece of paper.

2.) Cut out a piece of white paper (could be construction or printer paper) that is the exact same size as the cardboard wheel.

3.) Glue or tape it over top of the cardboard. This will be the inside of your picture wheel that will show most of your information.

4.) Evenly divide the circle into 5 sections. (It will look like a pizza with five slices.) In each section, write one of the facts from the required information (Interesting fact, scientific name, habitat, food sources, and reason(s) the species is endangered.) Make sure the information is legible and creative. Use colors and pictures if you wish!

![Diagram of Endangered Species Wheel]

This is what your cardboard base and cover piece of paper should look like after they are glued together with the white paper on top. All five sections of information MUST be on the wheel!
5.) For the spin-view part of the wheel, cut another piece of construction paper in a different color that is the same size as both the cardboard wheel and the cover paper. DO NOT GLUE THIS ON THE WHEEL!

6.) Using scissors, cut a triangle like piece that is THE SAME SIZE as your equally sized sections on the paper covered cardboard circle. It will look like you’re cutting a piece of pie out of the circle. The point of the triangle should be at the middle of the circle as shown below in the picture.

7.) On the spin-view cover, make sure you put the Common Name of your endangered animal, as well as a picture.

8.) Fasten the two halves together with a brass clasp so that when you rotate the spin-view cover, you can see one section of information through the cut out triangle piece

9.) Write your sources on the back of the cardboard circle!!!!

10) Present your Endangered species wheel to the class 😊
ENDANGERED SPECIES WHEEL

GOAL - To demonstrate and share knowledge of an endangered species.

DIRECTIONS:
1. Select an endangered species that you would like to learn about.
2. Research information about your endangered species.
3. Create a wheel of information to show your knowledge.

REQUIRED INFORMATION:

1. Common name ____________________________________________

2. Scientific name ___________________________________________

3. Habitat __________________________________________________

4. Food sources _____________________________________________

5. Reason(s) species is endangered _____________________________

6. One other really interesting fact _____________________________
7. Work cited:

GRADING:

_____ Notes and work cited complete (25)
_____ Title clearly visible (5)
_____ Information on wheel is complete (5)
_____ Creative (5)
_____ Neat (5)
_____ Spelling (5)
_____ Total (50)

COMMENTS:
